MINOA DESIGN RADIATORS ARE THE THINNEST
KNOWN RADIATORS IN THE WORLD.

Thanks to advanced production technology,
minimizes the energy consumption at production level,
Minoa Design Radiators are **eco-friendly** and known as
'green products'.

From 1st January 2018 the requirements foreseen in the EU Regulation 2015/118 for all electric local space heaters enter into force. In this context Minoa Design presents the new series of ErP electric radiators, which are all compatible with Ecodesign directives and characterized by maximum attention to energy saving that ensures great efficiency.

All the ErP Minoa Design radiators are equipped with three feature of:

- electronic temperature control
- opening window detector
- weekly scheduler
- stand-by

AT EACH PRODUCT DESIGN WE CHALLENGE OURSELVES,
IMPROVING THE DESIGN AND THE TECHNOLOGY TO ENHANCE
ENERGY EFFICIENCY FOR OUR RADIATORS.
